Team USA Sweeps Pan-Am Epee Gold in Lima

Comebacks in both team finals cap a six-gold weekend for the Americans at the Pan American Zonal Championships.

GAZETTE STAFF · EPEE ONLY, AS ALWAYS

The United States won all six team gold medals at the Pan American Senior Zonal Championships in Lima, Peru, with both epee squads delivering the weekend's best drama. The men trailed Venezuela 33–31 after seven legs before Gabriel Feinberg posted a 9–2 eighth leg, and anchor Ariel Simmons held off a 16–5 closing run from Colombia's John Edison Rodriguez to win 45–42.

The women were even more commanding, beating Canada 41–31 behind Hadley Husisian, Catherine Nixon, Charlene Kai Yan Liu, and Tierna Oxenreider. In individual action, Anna van Brummen upset Husisian 15–13 for women's epee gold in a 68-fencer field. The U.S. took four of six individual titles overall.

Why it matters here: zonals use the same team-relay format as our regional events — closing tight legs without panicking is exactly what coaches preach in our room.

NAC Season Opens in Orlando This Week

Division I, cadet, and Y14 epeeists head to the October NAC — first national points of the season.

The October NAC runs Oct. 9–12 in Orlando, Fla., with Division I, cadet, Y14, cadet team, and parafencing events — the first national points of the season. The Division I epee fields will show who spent the summer training. Admission is free and results post same-day. Next: November NAC in Columbus, December SJCC in Milwaukee.

Chatham Ranked 3rd in Preseason Epee Poll

High-school season previews list Chatham among the teams to beat — several Elite FC names on the roster.

Preseason polls place Chatham third in boys' epee and fifth in girls' heading into winter, with several Elite FC fencers expected to anchor both squads. Dual meets begin in December. The Gazette tracks results all season — high-school fencing is where many of our fencers first fence for something bigger than themselves.

§ FENCING 101 — THE DOUBLE TOUCH

Epee has no right-of-way: if both fencers hit within about 40 milliseconds, **both score**. That's why you see 1–1 counters where foil would give one light. Lesson for beginners: when you're up by one late in a bout, don't chase — make them come to you, because a double keeps your lead. When you're down, avoid the double at all costs; only single-light touches change the math.
